**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 November 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### **DETAILED ACTION**

This is in response to application filed on November 7, 2006, in which claims 6-8 are presented for examination.

#### ***Status of Claims***

Claims 6-8 are pending of which claim 6 are in independent form.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites the limitation "the compartment" in lines 2 and 4. It is unclear which compartment of the two compartments is being addressed. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Curtis (US 3,394,870).

Regarding claim 6, Curtis discloses a smoker's pouch for carrying material capable of being smoked, having at least a first and a second compartment or pouch pockets 14 and 15, wherein at least one of the compartments is releasably sealable, by being able to be folded and unfolded, to retain material capable of being smoked or smoking accoutrements in the compartment (figures 3, 5, 6 and column 3, lines 42-46). Curtis further discloses the pouch being formed from multiple layers of material and the compartments being formed between adjacent layers of material (figures 6 and column 2, lines 49-52 and 60-68).

Regarding claim 7, as best understood by the Examiner in light of the 112 rejection, Curtis further discloses one of the compartments being sealed by a seal i.e. a fold having respective formations i.e. flaps associated with adjacent layers of material forming the pouch. Curtis also discloses the respective formations being engageable with each other by being folded, to releasably seal one of the compartments (figure 5-6).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Curtis (US 3,394,870) in view of Ausnit et al (US 4,832, 505) or Ausnit herein.

Curtis further discloses the seal having a first formation i.e. a first flap and a second formation i.e. a second flap (figure 3).

Curtis fails to disclose:

(1) the first formation having a female channel with resilient sidewalls having a flange on an upper portion of at least one side wall that extends at least partially toward the opposing sidewall and

(2) the second formation having a male member with an enlarged portion receivable between the opposed sidewalls of the channel and adapted to be retained therein until the application of a force large enough to release the male member therefrom.

Ausnit teaches a reclosable zipper 22 having a female channel 24 with resilient side walls having a flange on an upper portion of at least one side wall that extends at least partially toward the opposing side wall, and a male member 23 with an enlarged portion receivable between the opposed side walls of the female channel and adopted to be retained therein until the application of a force large enough to release the male member (figure 2 and column 2, lines 56-61).

It would have been obvious to one of ordinary skill in the art have substituted a zipper as, for example, taught by the Ausnit reference for the foldable flaps of the Curtis device wherein so doing would amount to mere substitution of one functionally

equivalent sealing means for another within the same art and the selection of any of these sealing means would work equally well in the Curtis device.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Irving Silverman (US 2,674,289)

Gerard C. Grenier (US 2,062,001)

Albert Wax (US 2,510,918) all relate to tobacco pouches with sealing means.
